-SUBSTITUTE TRANSMITTAL LETTER-

I WAS TOLD BY AN INVENTOR SPECIALIST THAT I COULD PRESENT THIS PAPER WORK HERE IN PLACE OF MY PRIOR PROCEDURE IN THIS WAY THAT HAS NO CHANGE IN SUBJECT MATTER BUT HAS FINAL SPELLING CORRECTION THROUGH OUT AND IS TEN PAGES INSTEAD OF NINE DUE TO A CLEARER EXPLANATION OF MY PROCEDURE. THIS HAS A FILING DATE OF 05/20/2004 APPLICATION # 10/780,128 ART UNIT 1614 CONFIRMATION #2270 TODAYS DATE IS 07/23/04 OF THIS LETTER, I THANK YOU VERY MUCH FOR YOUR PATIENCE SINCERELY YOURS FRANK GULISANO

American Institute for Cancer Research did reply!

To whom it may concern: On your New York news cover magazine concerning cancer of the April fifth 2004 series, I have read this and many such articles over the years. But my story goes back about 15 years ago when I first started an experiment on my self to find an answer to some thing I wanted to know, and instead quite by accident I found out how to cure brain tumors with out invasive surgery or radioactive elements, and find myself living proof with this dead tumor in my brain that was not cancerous, and if it were, it would be dead anyway. I have applied for a patent on this procedure and hope to receive it with in a year. In the procedure I have explain also, how to cure metastasis cancer or to go about a cure in a solid way with out surgery or radioactive substances. The biological chemistry of cancer cells, to be sure is very complicated, which I do not understand as much as I would like to, and have no training here, how ever my logic more than makes up for this as the explanation for its demise should be simple in doing. To kill is easy to create is a another story. How many times in history have cures come about, certainly enough by accident or by trial and error that can not be explained fully or at all, as to how it happens? This explanation can wait, but not for the cure. This letter comes to you, known to me how it must sound, but its real! Keep this letter for the near future; and for the record I am not a medical person, but am self taught. Sincerely yours Frank Gulisano
Robinhoodone@AOL.COM 04/05/04. P.S. THIS LETTER WAS SENT TO THE NEW YORK NEWS MAGAZINE, AND I AM NOW SENDING THIS SAME LETTER TO YOU, AT THE ANNUAL FUND FOR CANCER RESEARCH AND PREVENTION FOUNDATION. 04/06/04. TO BILLY GRAHAM PERHAPS YOU CAN HELP ME SOME HOW CONCERNING THE ABOVE LETTER. IT WOULD BE A BENEFIT TO BOTH OF US I ASSURE YOU! 04/15/04. TO THE LEUKEMIA & LYMPHOMA SOCIETY 04/15/04 FAXED TO FORTUNE MAGAZINE, 04/16/04. TO RONALD MCDONALD HOUSE OF NEW YORK INC. 04/28/04 TO FORTUNE MAGAZINE AGAIN, 04/29/04 TO AMERICAN INSTITUTE FOR CANCER RESEARCH, 05/03/04 TO CANCER CARE 05/20/04 TO NATIONAL CANCER COALITION 06/24/04 TO THE NATIONAL CHILDREN'S CANCER SOCIETY 7/15/04

Brooklyn, NY 11208

Dear Mr. Gulisano:

Thank you so much for your recent letter to the American Institute for Cancer Research (AICR). We are very encouraged by the response of interested and knowledgeable people like yourself.

The Institute was established for the purpose of funding research concerning nutrition and cancer and developing public information materials to assist people in becoming more sensitive to this issue. Due to cutbacks in funding for various types of cancer research by the federal government, it is necessary for private groups, like AICR, to help ensure that no responsible research effort for the prevention, cure or treatment of cancer is overlooked.

I am pleased you share our interests and hope we can count on your continued support. Thank you for taking the time to write. I hope to hear from you again.

Sincerely,

Marilyn Gentry
Executive Director

MG

In Reply To American Institute

Of all the people I wrote to, sent fax, and gone to a few research departments in dropping off my material, I have found it encouraging to hear from you which is a first. You are the first person Mss. Marily Gentry to have the decency to write to me, in so doing I know you are a very sensitive and truthfull person and that it effects you a lot when you hear a person dieing from this disease, and how many times did you pray for a cure? can you recall? I will spend \$1,050 on this procedure for small entity status and it has passed its first test in being filed to continue for further examination. Oddly enought its a simple procedure that takes many hours to perform and such discovery could only have come by accident and a lot of thinging as to what happen to me which took me many months to figure out. My belief is, to have started this with a cure in mine would have taken much to many years if at all in our life time in curing brain tumors, spilling over to metastasis tumors and my showing how to research this in what I believe to be a solid footing for a cure. This will be done by changing the chemical composition of a substance twice into something much different, and the timing of its use is crucial. The fact that I was looking for some simple answers for something else in my experment on my self, must mean this tumor cure was meant to be. At any rate you will be the first I will contact when this patent is issued to me and we will find out where the truth lies at your research center perhaps. Why I let this information lie for 15 years from age 55, I honestly dont know. Sincerely
Yours FRANK GULISANO 07/01/04

Message :

I AM THINKING OF APPLYING FOR A GRANT ON MY FUTURE PATENT THAT I WILL RECIEVE SOON, CONCERNING THE CURE FOR BRAIN TUMORS WITHOUT INVASIVE SURGERY OR RADIOACTIVE MATERIAL PLUS A METASTASIS POSSIBLE CURE IN MY PATERT MATERIAL. I HAVE NO IDEA HOW TO DO THIS FUNDING OR WHAT READING MATERIAL I NEED, AS I AM A LAYMAN AND DONE RESEARCH ON MY SELF 15 YEARS AGO FOR SOMETHING DIFFERENT AND FOUND THIS CURE ABOVE BY ACCIDENT. E MAIL- ROBINHOODONE@AOL.COM TEL.#7182770024 OR 19173343247 CAN YOU HELP, THANK YOU.

Dear Mr. Gulisano:

This is in response to your July 7, 2004 request for information on the NSF's funding of research in science and engineering.

The following web site will provide you with responsive information:
